DETAILED ACTION

Claims 1-16 and 18-20 are currently pending in the instant application.

Applicants have amended claims 1, 2, 8 and 11 in an amendment filed on August 4, 2009. Claims 1-13, 16 and 18 are rejected and claims 14, 15, 19 and 20 are withdrawn in this Office Action.

I. *Response to Arguments*

Applicants' amendment, filed on August 4, 2009, has overcome the rejection of claims 1, 3 and 6-10 under 35 USC 103 as being unpatentable over Tien, et al. (US Patent 6, 541, 635); the rejection of claims 11 and 12 under 35 USC 112, second paragraph as being indefinite and the objection of claims 2, 4, 5, 11-13, 16 and 18 as being dependent upon a rejected based claim. The above rejections and objection have been withdrawn.

II. *Rejection(s)*

Claim Rejections - 35 USC § 112, first paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-13, 16 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application

Art Unit: 1626

was filed, had possession of the claimed invention. Applicants have amended claims 1 and 2 to add the limitation "said optionally substituted *trans*-octahydroindole-2-carboxylic acid having no protecting group" but this limitation is not disclosed in the original specification and is considered new matter because the amendment introduces subject matter that is not supported by the original disclosure. The original specification does not specifically disclose that the starting material *trans*-octahydroindole-2-carboxylic acid could not have a protecting group. The specification has support for an unsubstituted *trans*-octahydroindole-2-carboxylic acid which is preferably used and is found on page 7, lines 5-10 of the original specification. Applicants are suggested to amend claims 1 and 2 so that the *trans*-octahydroindole-2-carboxylic acid used in the process is unsubstituted.

III. **Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1626

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
